

SOUMYAKANT TRIPATHY

Senior Software Engineer – QA Automation / Python
Bengaluru, India | +91-7978898543 | soumyakant.tripathy422@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Software Engineer (SDET) with 3.5 years of experience in manual and automation testing, specializing in Python-based automation, CI/CD integration, and cloud-supported testing workflows. Proven experience in designing scalable automation frameworks and leading test execution for enterprise healthcare applications.

TECHNICAL SKILLS

Programming & Scripting: Python (automation scripting, utilities, test frameworks), JavaScript (UI automation, BDD support)

Test Automation & QA: Selenium, PyTest, Robot Framework, Manual Testing (SIT, Functional, Regression), Test Planning & Execution, Defect Analysis & Reporting

CI/CD & Dev Practices: Jenkins, CircleCI, Git, BitBucket

API & Integration Testing: Postman (API validation, response verification)

Cloud & Platforms: Amazon Web Services (AWS): S3, IAM (foundational knowledge), CI-integrated cloud workflows

Other: Agile / Scrum, Client-facing communication, Mentoring & onboarding

PROFESSIONAL EXPERIENCE

Senior Software Engineer – SDET (Manual & Automation)

Relevance Lab | Aug 2022 – Present

(Promoted from Software Engineer to Senior Software Engineer in 2025)

Client Domains: Crypto-based Platform (PolySign Inc.), Healthcare (Johnson & Johnson – Medical Systems)

Key Contributions

- Designed, developed, and maintained automation frameworks using Selenium, PyTest, and Robot Framework to support system integration and end-to-end testing.
- Built Python-based automation utilities to capture application screenshots, generate structured documents, convert outputs to PDFs, and upload artifacts to Amazon S3, fulfilling direct client requirements.
- Integrated automated test execution into CI/CD pipelines (Jenkins, CircleCI) to enable continuous validation of builds before production releases.
- Led manual testing and test execution for healthcare compliance workflows (GMP Gatekeeper), ensuring release readiness and quality standards.
- Performed API testing using Postman to validate backend request/response behavior and service reliability.
- Collaborated with developers to improve testability by introducing data-test-ids and implementing BDD-style Selenium automation using JavaScript.
- Improved overall test coverage to ~90% and reduced regression execution time by optimizing reusable automation components.
- Conducted code reviews and PR reviews for automation scripts to ensure quality, maintainability, and consistency.
- Worked directly with clients and cross-functional teams for requirement clarification, defect triage, and release sign-off.

Tools & Technologies: Python, Selenium, PyTest, Robot Framework, Jenkins, CircleCI, Postman, Amazon S3, JavaScript, Git, BitBucket, Manual Testing and Test Report

Key Recognitions: “Monthly I Appreciate” (Nov 2024) for rapid adaptation to Robot Framework and delivery of an end-to-end automated document generation solution; “Excellence in Delivery – Execution” (May 2024, Team Award) and “Rising Star” (Feb 2023) for automation impact, rapid upskilling (Rust/JS), and test coverage improvement.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Aug 2018 – Jul 2022), Biju Patnaik University of Technology, Odisha \ Trident Academy of Technology

LEARNING & CERTIFICATIONS

AWS Cloud Fundamentals – In Progress | Rust Programming – Foundational exposure
